**PRODUCT DESCRIPTION**

Tradition, identity and territory but also passion, commitment and experience: these are the values shared by the Mergè Company which for three generations continues to tend native grapes, making use of the soil potentiality so that its bottles gather flavours which are a modern expression but at the same time represent historical unique wine patrimonies.

The work in the vineyard, the selection of the grapes, the experienced staff and the advanced equipment are without any doubt the successful keys of Armando and Felice Mergè work.
